

Pet Kit

The first 7-10 days after a major emergency or disaster are critical. Electricity, gas, water, and telephones may not be working. In addition, public safety services such as police and fire departments will be busy handling serious crises. You and your pet should be prepared to be self-sufficient — able to live without running water, electricity and/or gas, and telephones — for at least 7-10 days following a major emergency. To do so, keep on hand in a central location (preferably with your families' home disaster supply kit as well as your car kit) the following:
